

PROTECTION

We all have a responsibility to protect our community.

COVID-19 VACCINES ARE HERE!

Due to limited supply, COVID-19 vaccines will be given first to health care workers and nursing home residents, followed by other high risk groups such as essential workers, elders, and adults with high-risk medical conditions (e.g., cancer, heart disease, kidney disease, diabetes, etc.).

Vaccines may be given to other priority groups as determined by local tribal governments. Contact your local healthcare facility. Learn more about the vaccine at [cdc.gov](https://www.cdc.gov).
